Journal of Wind Engineering and Industrial Aerodynamics 50 (1993)
Elsevier

Contents Volume 50 (1993)

Preliminary pages
Introduction

Computational studies
Computation of conductor drag coefficients
R.P. Selvam (Fayetteville, AR, USA) and D.A. Paterson (North Ryde, NSW, Australia) 1
Computational separated-reattaching flows around a rectangular cylinder
T. Tamura (Tokyo, Japan), Y. Itoh and K. Kuwahara (Kanagawa, Japan) 9
Predictions of generic wing-body junction flow behaviour
J.G. Bain and C.A.J. Fletcher (Sydney, NSW, Australia) 19
Wind loads on bridge deck by the penalty – hybrid/mixed finite element method
B. Zhu, D.P. Chen and J.S. Shang (Chengdu, P.R. China) 31
Numerical study on wake patterns and aerodynamic forces of an oscillating cylinder with a circular and rectangular cross-section
A. Okajima, K. Kitajima and H. Ueno (Kanazawa, Japan) 39
Stream-function based multiple bluff bodies 2D flow analysis
G. de Felice, F.M. Denaro and C. Meola (Napoli, Italy) 49
Numerical study on flow past 2D square cylinder by Large Eddy Simulation: comparison between 2D and 3D computations
S. Sakamoto (Yokohama, Japan), S. Murakami and A. Mochida (Tokyo, Japan) ... 61
Computation of wind flow around two tall buildings
D.A. Paterson (North Ryde, NSW, Australia) and A.T. Papenfuss (Clayton, Vic., Australia) 69
A numerical study on vortex-excited oscillations of bluff cylinders
T. Nomura (Tokyo, Japan) 75
The effect of combinations of mean current and oscillatory flow on the forces induced on a bluff body
J.M.R. Graham, R.H. Arkell and C.Y. Zhou 85
Effects of shear rate on the flow around a square cylinder in a uniform shear flow
K. Ayukawa, J. Ochi, G. Kawahara and T. Hirao (Matsuyama, Japan) 97

Bluff-body aeroacoustics
Aerodynamic noise generated by two circular cylinders arranged in tandem
O. Mochizuki, M. Kiya, T. Suzuki and K. Komiyama (Sapporo, Japan) 107
The approximate sound power generation associated with the fluctuations of an enclosed acoustically small flow
P.L. Jenvey (Victoria, Australia) 117
Vortex shedding from flat plates under the influence of an acoustic field
R. Parker, A.H. Hammoud and S.A.T. Stoneman (Swansea, UK) 129

Building aerodynamics

Wind-tunnel measurements of flow field characteristics around a heated model building
B. Ruck (Karlsruhe, Germany) 139
Snowdrifting simulation around Davis station workshop, Antarctica
D.J. Smedley, K.C.S. Kwok (Sydney, NSW, Australia) and D.H. Kim (Seoul, Korea) 153
Conical vortices over side face of a 3-dimensional square prism
Y. Okuda (Osaka, Japan) and Y. Taniike (Kyoto, Japan) 163
Characteristics of fluctuating wind pressure on long low-rise buildings with gable roofs
M. Kanda and E. Maruta (Narashino, Japan) 173
Local peak wind pressure coefficients for cuboidal buildings and corresponding pressure gust factors
J. Wacker and E.J. Plate (Karlsruhe, Germany) 183
Proper orthogonal decomposition of roof pressure
B. Bienkiewicz, H.J. Ham and Y. Sun (Fort Collins, CO, USA) 193
Flow patterns and pressure field around a full-scale building
R.P. Hoxey (Bedford, UK) and P.J. Richards (Auckland, New Zealand) 203
Field experiments for building aerodynamics
B.B. Yeatts and K.C. Mehta (Lubbock, TX, USA) 213
The distribution and correlation of fluctuating pressures on the Texas Tech building
C.W. Letchford (Queensland, Qld, Australia) and K.C. Mehta (Lubbock, TX, USA) 225
Mean wind pressures on arched-roof buildings by computation
J.D. Holmes (Highett, Vic., Australia) and D.A. Paterson (North Ryde, NSW, Australia) 235
Geometric parameters that affect wind loads on low-rise buildings: full scale and CFD experiments
R.P. Hoxey, A.P. Robertson (Bedford, UK), B. Basara and B.A. Younis (London, UK) 243
Aerodynamics of low-rise buildings and codification
M. Kasperski (Bochum, Germany) 253
Drag and aerodynamic interference on microwave dish antennas and their supporting towers
J.D. Holmes (Highett, Vic., Australia), R.W. Banks and G. Roberts (Watsonia, Vic., Australia) 263

Wind-induced dynamic response

Aerodynamic effect of wind induced torsion on tall buildings
D.L. Beneke and K.C.S. Kwok (Sydney, NSW, Australia) 271
Bending and torsional vibration of tall buildings in strong wind
H. Kawai (Saitama, Japan) 281
Self-excited torsional oscillation of rectangular prisms in a smooth flow
T. Matsumoto (Ishikawaken, Japan) 289
Torsional vibration and stability of wind-excited tall buildings with eccentricity
W.J. Zhang (Sydney, NSW, Australia), Y.L. Xu (Townsville, Qld., Australia) and K.C.S. Kwok (Sydney, NSW, Australia) 299
Wind response of a tower (Typhoon observation at the Nagasaki Huis Ten Bosch Domtoren)
Y. Tamura (Kanagawa, Japan), K. Shimada and K. Hibi (Tokyo, Japan) 309

Wind-induced response of high-rise buildings – effects of corner cuts or openings in square buildings
K. Miyashita, J. Katagiri, O. Nakamura (Tokyo, Japan), T. Ohkuma, Y. Tamura (Kanagawa, Japan), M. Itoh and T. Mimachi (Tokyo, Japan) 319
An evaluation of onset wind velocity for 2D coupled galloping oscillations of tower buildings
S.G. Liang (Wuhan, P.R. China), Q.S. Li, G.Q. Li (Harbing, P.R. China) and W.L. Qu (Wuhan, P.R. China) 329
Prediction of the wind induced response of multi-storey building using simultaneous multi-channel measuring control system
M. Suzuki, K. Kondo, S. Sanada and K. Minamide (Tokyo, Japan) 341
Analysis on control of flow-induced vibration by tuned liquid damper with crossed tube-like containers
X.T. Zhang (Shanghai, P.R. China), R.C. Zhang (Princeton, NJ, USA) and Y.L. Xu (Townsville, Qld., Australia) 351
Active control of super-tall structure vibrations under wind action by a boundary layer control method
Y. Kubo, H. Yasuda, C. Kotsubo (Kitakyushu, Japan) and K. Hirata (Hiratsuka, Japan) 361

Measurement techniques

Mapping the velocity field in a centrifugal fan using particle image velocimetry
I.C. Shepherd and R.F. LaFontaine (Highett, Vic., Australia) 373
PIV velocity measurements close to a bluff body
A. Cenedese, G. Doglia, M. Sallusti and P. Viotti (Rome, Italy) 383
